PROFESSIONAL EXPERIENCE

Freelance Software Developer (1 December 2021 – to date)

Duties include:

- Creating an app to manage a perfume selling/reselling business. The app is meant to dismiss the use of excel and allow the user to sell the perfumes online and manage the users of the app. Details of the app can be found at Bare Perfumes Mobile App (<https://www.shanahjr.co.za/projects/bare-perfume-app>)

Software Developer – KYC Solutions Provider (14 Sept 2023 – to date)

Duties include:

- **Quality Assurance:**
 - Test new features and ensure as many bugs as possible are identified
 - Relay information to developers about the problems experienced
 - Collect information from users and other stakeholders of the system and compile this into information that developers can use to improve the system
- **Documentation:**
 - Document functional requirements
 - Document user guides
 - Document internal company processes
- **Data Importing:**
 - Write scripts (PHP and Go lang) to import client data and documents into the system
- **Software Development:**
 - Developing new features and customizations should the need arise.
 - Fix bugs
- **System Administration (Linux Server Environments:**
 - Deployment of updates, features or patches
 - Developing deployment plans to make new deployments as seamless as possible
 - Reviewing logs in the event of system failures

OTHER EXPERIENCES

- Programming Tutor
 - During and after university I assisted students in understanding programming concepts along with providing assistance with completing assignments.
- Creation of a Full Stack solution to manage the operational processes of a company in South Africa
 - During my last year at university, there was a group assignment where the tasked with finding an actual company and building a solution for them that would result in significantly less use of paper and excel to handle their operations.
 - A video description of a big part of the project that I worked on in its entirety can be viewed on the link below: <https://www.shanahjr.co.za/projects/centurion-ice-manager>
- Working with Cloudflare to create protected routes to publicly accessible admin dashboards
- Self hosting applications on Linux servers using various tools such as Nginx, Apache, Cloudflare Tunnels, Tailscale, etc

ACHIEVEMENTS

- Matric (Form 5) Top Student in IT
